

## Road Report

On April 25<sup>th</sup> the albanil and assistant began the 2022 road maintenance project. Starting in front of the home of Neil Canter, Casa Cascadas. Pavers were relayed in areas where pipes crossings had been laid to close to the surface of the road and were breaking up. If pavers could not be used, we used concrete and rebar.

After six weeks of work, we have reset pavers and restored four topes and are working just in front of Bellamar. We have to reset pavers in front of the Community Center where an inground electric station was repaved very poorly by CFE.

In July George Pritchard and Peter Swenson will work with Lou Vitelli the owner of Casa Redondo to design a new topes for the pluma. Lou very graciously volunteered to pay for the new system.

The expenses so far cost us in labor cost \$42,000.00 and material costs \$15,530.00 pesos
